

SC-20F

POTABLE WATER TREATMENT COAGULANT

- * Excellent Potable Water Treatment Product NSF Certified Up To 250 mg/L
- * Exceptional Finished Water Quality.
- * Easy-To-Mix and Feed Liquid Product
- * High Activity Level for Effective Low Dosage Performance
- * High Charge Density For Difficult To Break Waste Streams
- * Reduced Sludge Volume over Conventional Metal Salts
- * Effective over a Wide pH and Temperature Range
- * Built In Buffering Eliminates Need For Caustic Enhancement In Water Treatment Processes.

DESCRIPTION: SC-20F is a highly cationic charged coagulant. This liquid product provides the user with reliable results in water and waste treatment applications where complete coagulation and settling is essential. When used in conjunction with medium and high molecular weight polymers, the results are synergistic. **This products had a polyamine added for quicker settling capabilities. **

SOLUTION PREPARATION: SC-20F is completely water-soluble. The recommended procedure for preparation of stock solutions consists of drawing the amount of dilution water required for a batch. Add SC-20F while stirring the solution. SC-20F may also be fed neat. Neat results may be superior to diluted samples.

SAFETY HANDLING AND STORAGE: Avoid direct contact with skin and eyes. Personnel handling product should wear protective clothing and goggles. Spilled product should be contained and residues flushed with water. Major spills should be pumped into lined metal drums, fiberglass or plastic containers. As with all chemicals, Material Safety Data information should be consulted.

TYPICAL PROPERTIES:

* Ionic Nature: Cationic * Freeze Point: -12° F * Density: 10.5 lbs/gallon

* pH (Neat): 2-3

* Optimal Shelf Life: 6 Months

* Physical Form: Water white liquid

* Al2O3: 12.5% (+/- 0.5) * Basicity: 70% (+/- 5)

PACKAGING: SC-20F is packaged in lined 570 lbs drums, 3,000 lbs totes, and is available in bulk quantities.
